INTRODUCTION

It is with great pleasure that I present this third volume of our publication, *Key Achievements and Impacts of the Africa Centres of Excellence (ACE) Project in Nigeria*, which is a Directory of Researchers in Nigeria's ACEs. This directory highlights the exceptional scholars, scientists, and innovators who have been instrumental in driving the success of the ACE Project in Nigeria and across Africa.

Since its inception, ACE has been a transformative initiative, strengthening higher education and research excellence in priority fields such as health, agriculture, education, science, technology, engineering and mathematics. Funded by the World Bank and, in its second phase, the Agence Francaise de Developpement (AFD), in partnership with the Nigerian government and participating universities, the ACEs have not only enhanced regional specialisation but have also fostered collaboration, innovation, and sustainable development.

This publication serves as a compendium of the brilliant minds behind the groundbreaking research, capacity-building initiatives, and impactful projects undertaken by Nigeria's ACEs. By profiling these researchers, we aim to:

- Showcase the expertise and diversity of Nigeria's academic talent,
- Facilitate networking and collaboration among scholars, industry stakeholders, and policymakers,
- Document the contributions of ACE researchers to national and regional development, and
- Inspire future generations of researchers to engage in high-impact, solution-driven scholarship.

The achievements documented in this publication reflect the dedication of our researchers, the support of our partner institutions, and the commitment of the ACE Project to advancing knowledge and addressing Africa's critical challenges. As we continue to build on these successes, we remain steadfast in our mission to position Nigeria as a hub of academic and research excellence in Africa.

I extend my deepest appreciation to the World Bank, AFD the Federal Government of Nigeria, the National Universities Commission (NUC), the ACE host institutions, and, most importantly, the researchers whose tireless efforts have made this milestone possible. Together, we are shaping a brighter future through education, innovation, and collaboration.
